WORK EXPERIENCE

Web Developer & AI Automation Executive | Digisoft.in : Aug 2025 – Present

- Developed and maintained web applications and business websites using PHP, HTML, CSS, Bootstrap, JavaScript, along with WordPress and Shopify, improving website performance and delivery efficiency by 25%.
- Implemented new features, customized website functionality, integrated WooCommerce solutions, and resolved technical issues, reducing support requests by 30%.
- Built business automation solutions using Google Apps Script, Google Sheets, and AppSheet, streamlining manual workflows and improving operational efficiency by 40%.

Python Odoo Developer Intern | Weblytic Labs: Apr2025 - Aug 2025

- Developed and customized Odoo E-commerce modules using Python, improving online order processing efficiency by **25%**.
- Worked with PostgreSQL databases and optimized queries, improving data retrieval performance by **15%**.
- Resolved application bugs and workflow issues, contributing to **90%** successful issue resolution during development cycles.
- Collaborated on module enhancements and system improvements, increasing overall application reliability and user experience by **20%**.

SKILLS

Programming Languages: C++, Java, Javascript, SQL

Front-End: HTML5, CSS3, React.js

Back-End: SpringBoot, Spring MVC, SpringSecurity, Spring Data JPA(Hibernate), RESTful API Development, Microservices Architecture (Basic)

Databases: MYSQL, PostgreSQL, phpMyAdmin

Tools & Platforms: GitHub, VsCode, IntelliJ IDEA, Postman, WordPress, Zoho CRM, Interakt, Apps Script

EDUCATION

GL Bajaj Greater Noida Oct 2023 - Oct 2025

Master of Computer Application (MCA) 73%

PROJECTS

Smart Inventory Management System: | [Live Demo](#) | [Frontend Code](#) | [Backend Code](#) |

Tech Stack: Java, Spring Boot, Spring Security, JWT, Hibernate, React.js, Tailwind CSS, PostgreSQL, REST APIs, Neon DB, Render, Vercel

- Developed a full-stack Smart Inventory Management System with secure JWT authentication and role-based access control (Admin, Warehouse Manager, Sales Executive).
- Built REST APIs and a responsive React.js frontend for category, product, inventory, stock transaction, low-stock alerts, and paginated product management.
- Deployed the application using Render (Backend), Vercel (Frontend), and Neon PostgreSQL, enabling secure cloud-based access and real-time inventory management.

Hospital Management System (Core Java, JDBC, MYSQL): [Project Link](#)

- Built a hospital management system to manage patient and doctor records along with appointment scheduling, reducing manual record-keeping efforts by 40%.
- Optimized database handling using efficient JDBC queries, resulting in 30% faster appointment booking and data retrieval.

COMPETITIONS

- Contributed as a team member in Smart India Hackathon 2024 (Internal Round).

ACHIEVEMENTS

- Qualified **NIMCET & CUET MCA Entrance Exams**; awarded **scholarship** by AKTU for MCA at GL Bajaj.
- Solved 100+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks and 50 Leetcode SQL Problems on Leetcode. | Leetcode - [Link](#) | GeeksforGeeks - [Link](#) |

CERTIFICATES

- Data Structure & Algorithm Using C++ | MySirG.com** Jul 2023 - Sep 2023
 - Covered advanced **DSA concepts**: Arrays, Strings, Linked List, Stack, Queue, Trees, Graphs.
 - Enhanced **analytical reasoning** and **coding performance** using structured programming techniques.
- Participated in **Smart India Hackathon 2024 Internal Hackathon**.
