WORK EXPERIENCE

Java Developer & AI Automation Executive | Digisoft.in : Aug 2025 – Present

- Developed and maintained backend application features using Java and Spring Boot, improving code stability and feature delivery efficiency by 25%.
- Created and updated REST APIs for frontend-backend communication, reducing data processing delays by 20%.
- Identified and resolved backend issues related to application logic and API responses, improving issue resolution rate by 90%.

Python Odoo Developer Intern | Weblytic Labs: Apr2025 - Aug 2025

- Developed and customized Odoo E-commerce modules using Python, improving online order processing efficiency by **25%**.
- Worked with PostgreSQL databases and optimized queries, improving data retrieval performance by **15%**.
- Resolved application bugs and workflow issues, contributing to **90%** successful issue resolution during development cycles.
- Collaborated on module enhancements and system improvements, increasing overall application reliability and user experience by **20%**.

SKILLS

Programming Languages: C++, Java, Javascript, Python, SQL

Front-End: HTML5, CSS3, React.js

Back-End: Spring Boot, Spring MVC, SpringSecurity, Spring Data JPA(Hibernate), RESTful API Development, JWT Authentication & Authorization, Microservices Architecture (Basic), Exception Handling Maven

Databases: MYSQL, PostgreSQL, phpMyAdmin

Tools & Platforms: GitHub, VsCode, IntelliJ IDEA, Postman, WordPress, WooCommerce, Zoho CRM, Interakt

EDUCATION

GL Bajaj Greater Noida Oct 2023 - Oct 2025
Master of Computer Application (MCA) 73%

PROJECTS

Smart Inventory Management System:

Tech Stack: Java, Spring Boot, Spring Security, JWT, Hibernate, PostgreSQL, REST API

- Built a Smart Inventory Management System backend using Java, Spring Boot, Hibernate, and PostgreSQL.
- Implemented JWT-based authentication and role-based authorization using Spring Security.
- Developed REST APIs for category, product, stock management, low-stock alerts, and paginated product retrieval.
- Added global exception handling and business validation for secure and scalable inventory operations.

Hotel Reservation System | Core Java, JDBC, MySQL: [Project Link](#)

- Built a console-based system for hotel booking & management using **Core Java** and **JDBC**.
- Implemented **CRUD operations** with **MySQL** and applied **OOPs concepts** for modular design.

Hospital Management System (Core Java, JDBC, MYSQL): [Project Link](#)

- Built a hospital management system to manage patient and doctor records along with appointment scheduling, reducing manual record-keeping efforts by 40%.
- Optimized database handling using efficient JDBC queries, resulting in 30% faster appointment booking and data retrieval.

COMPETITIONS

- Contributed as a team member in Smart India Hackathon 2024 (**Internal Round**).

ACHIEVEMENTS

- Qualified **NIMCET & CUET MCA Entrance Exams**; awarded **scholarship** by AKTU for MCA at GL Bajaj.
- Solved 100+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks and 50 Leetcode SQL Problems on Leetcode. | Leetcode - [Link](#) | GeeksforGeeks - [Link](#)

CERTIFICATES

- Data Structure & Algorithm Using C++ | MySirG.com** Jul 2023 - Sep 2023
 - Covered advanced **DSA concepts**: Arrays, Strings, Linked List, Stack, Queue, Trees, Graphs.
 - Enhanced **analytical reasoning** and **coding performance** using structured programming techniques.
- Participated in **Smart India Hackathon 2024 Internal Hackathon**.
